PROFILE INFO

I'm a front-end developer with hands-on experience building responsive, user-friendly websites—mainly for e-commerce projects. Over the years, I've worked across web development, customer support, and online education, which has helped me develop strong communication skills and a people-first mindset. I'm comfortable working with HTML, CSS, JavaScript, and Shopify Liquid, and I enjoy creating clean, functional designs that feel intuitive to users. I value teamwork, constant learning, and always aim to deliver work that's both effective and polished.

EXPERIENCE

■ 2021 - 2022

Philippines/ Japan

Online English Teacher / Native Camp

- Delivered engaging online English lessons to non-native speakers with a focus on fluency and comprehension.
- Received consistently high ratings from students for teaching quality and lesson engagement.
- Developed customized lesson plans based on individual student needs and language proficiency.
- Enhanced communication and presentation skills through daily interactions with students.

■ September 2024 – Present

Customer Service Representative / Klarna Bank – Remote

- I support Klarna customers with a range of credit and purchase-related questions, from payment delays and declined applications to refund requests and order issues.
- I work across chat, phone, and email to help users resolve problems quickly and with care, always aiming to offer clear, solution-focused assistance.
- In my role, I've dealt with everything from account verification to complex disputes, documenting each case carefully using Klarna's internal tools while respecting customer privacy and data policies.

■ 2024 / May - 2024 / August

Tirana/ Albania

Front-End Developer Intern (Shopify) / Shero Commerce

- Developed and customized responsive e-commerce websites for clients using Shopify's Liquid framework.
- Collaborated with clients to design and implement visually appealing and user-friendly online stores.
- Managed front-end code to improve website performance and user experience.
- Integrated third-party apps and APIs for enhanced store functionalities.

EDUCATION

10/2022 - 07/2024

Bachelor's Degree in Programming

- 1.Coursework included HTML, CSS, JavaScript, and other programming languages.
- 2.Participated in projects that involved developing web applications and software solutions.
- 3.Twice the best front end project of the academic year.
